Biography:

Milton is the Signals Management Engineer in the Signals Management Section. A Certified Public Manager, he leads a group of electrical engineers and technicians that is responsible for the specification, design, procurement, and technical support of traffic signal equipment. Under Milton's charge, the Traffic Electronics Center provides technical support to the Divisions through the repair of electronic devices installed on the State's highway system. A graduate of N. C. State, Milton has over 25 years of control equipment design experience.
